

Marisa Paninski

1. Submit the GitHub URL for the contact page with your LinkedIn logo on it.

<https://mbpaninski.github.io/ist263/lab05/week5contactpage.html>

Submit the GitHub URL for the bio page with your photoshop image on it.

<https://mbpaninski.github.io/ist263/lab05/week5paninski-bio.html>

2. Answer the following: HTML has a way to scale an image down by entering a smaller width in the width attribute of the img tag. Why is scaling it down in Photoshop a better idea?

**Scaling an image down in photoshop is a better idea than coding the size because it provides a more user-friendly approach when building the website. It is better for adding multiple layers and doing precise adjustments. It can also provide a higher quality image because of the different forms to choose( JPG, PNG, GIF)**

3. Answer the following: What main message were you trying to communicate with your original image? Explain how the different parts you put together helped communicate that message.

**The message I was trying to communicate with my original image is that I have a fun and lighthearted personality. I am also trying to communicate that I have a love for nature and the outdoors. The photoshopped bowtie and the "Be Spontaneous" quote was to help convey that and show how the little joys in life make it fun.**

4. Submit answers to the following:

a. What questions did you have about the lab?

Is photoshop where we will be doing all of the editing for websites?

b. What was the hardest part of the lab?

The hardest part of this lab was figuring out how to use the different features on photoshop.

c. Rate your comfort level with this week's topics.

1 ==> I can do this on my own and explain how to do it.

**2 ==> I can do this on my own without any help.**

3 ==> I can do this with help or guidance from others.

If you choose this level, please indicate HOW this person helped you.

4 ==> I don't understand this at all yet and need extra help.
